

Power Generation Facility

INDUSTRY: **Energy**

APPLICATION: **Turbine Crane/Power Generation**

PRODUCT: **90 Ton Top Running Double Girder Crane**

SERVICES: **Provided Design, Manufacture, Installation, Quality and Load Testing**

THE CHALLENGE

To move turbine generator components in a plant containing a combustion turbine generator, steam generators and related equipment.

THE SOLUTION

American Crane provided the customer with a 90/20 Ton Top Running Double Girder Class A Turbine Crane that was custom manufactured specifically for this facility. The crane's robust design, including a 110 foot span, supports reliable lifts and movements demonstrating its durable construction.

THE RESULT

The special design of this powerhouse crane enables it to safely perform and operate in a tough environment, while protecting some of the most expensive and valuable equipment in the power plant.
